COURSE

FACTORY TOUR

# 11<sup>TH</sup> MAY 2018

## Autogenous Bone “Gold Standard” Back in Daily Practice...

DR. UĞUR MERİÇ & DR. ÜLKEM CÜRAL

Even if the Autogenous Bone is accepted as a “Gold Standard”, usage in our daily practices is very limited. Difficulties in acquiring sufficient quantity of the material, needs a secondary surgery and probable resorptions possibilities are the prejudices for the clinicians avoiding autogenous bone in their daily practices. The philosophy indications and application of autogenous bone from simple to complex cases will be discussed in this presentation. Techniques of collecting autogenous bone by drilling without saline.

Usage of Autogenous Bone in practice.

# 12<sup>TH</sup> MAY 2018

## Paradigm Shift in Long Term Success and Hybrid Prosthesis...

DR. AHMET KIÇILI & DR. DEFNE BURDUROĞLU & DT. FARIBA KHAYYAT

Success by design not by chance. Implant abutment selection; type, design, and material. Advantages of the Conical Connection type systems. Screw-retained versus cement-retained implant restorations. Journey through the process of the treatment planning, temporization, managing abutments, taking impression and delivering the final prosthetics. Implant impression techniques...
