PROGRAM IDS 2019

12 MAR. 2019, TUESDAY

- 14.00 Autogenous Bone "Gold Standard" Back in Daily Practice...
14.30 HANDS-ON
- 16.00 Quattrofix: All on 4 Concept
16.30 HANDS-ON

13 MAR. 2019, WEDNESDAY

- 11.00 A Natural Synergy "PRP-RAPID Implant": Sinus lift +
Immediate implantation + Plasma-Therm Protocol.
11.30 HANDS-ON
- 14.00 Quattrofix: All on 4 Concept
14.30 HANDS-ON
- 16.00 Autogenous Bone "Gold Standard" Back in Daily Practice...
16.30 HANDS-ON

14 MAR. 2019, THURSDAY

- 11.00 Quattrofix: All on 4 Concept
11.30 HANDS-ON
- 14.00 Autogenous Bone "Gold Standard" Back in Daily Practice...
14.30 HANDS-ON
- 16.00 A Natural Synergy "PRP-RAPID Implant": Sinus lift +
Immediate implantation + Plasma-Therm Protocol.
16.30 HANDS-ON

15 MAR. 2019, FRIDAY

- 11.00 Autogenous Bone "Gold Standard" Back in Daily Practice...
11.30 HANDS-ON
- 14.00 A Natural Synergy "PRP-RAPID Implant": Sinus lift +
Immediate implantation + Plasma-Therm Protocol.
14.30 HANDS-ON
- 16.00 Quattrofix: All on 4 Concept
16.30 HANDS-ON

Autogenous Bone “Gold Standard” Back in Daily Practice...

Even if the Autogenous Bone is accepted as a “Gold Standard”, usage in our daily practices is very limited. Difficulties in acquiring sufficient quantity of the material, needs a secondary surgery and probable resorptions possibilities are the prejudices for the clinicians avoiding autogenous bone in their daily practices. The philosophy indications and application of autogenous bone from simple to complex cases will be discussed in this presentation. Techniques of collecting autogenous bone by drilling without saline.

Immediate Fixed Rehabilitations of Totally Edentulous Jaws – Quattrofix

- Angulated placement of implants and extension of the prosthetic suprastructure
- Surgical and prosthetic approaches for fixed rehabilitations on four-to-six implants.
- Immediate loading protocols on four-to-six implants.
- Surgical planning of the totally edentulous case for the best prosthetic outcome.

**DR. FISNIK KASAPI**

ORAL SURGEON DDS, MSc

A Natural Synergy “PRP-RAPID Implant”: Sinus lift + Immediate implantation + Plasma-Therm Protocol.

The placement of a dental implant in the edentulous posterior maxilla often is followed with many difficulties as result of an insufficient bone due to pneumatisation of the maxillary sinus and bone resorption after extraction. Recently, we have developed new Plasma-Therm protocol for production of new (fully autologous) graft material and barrier membrane. PRP derives “elixir of life” & RAPID Implant system – Natural Synergy
